

# IDEAS TO IMPROVE OUR PLANET

1

**safe ways to go  
to the institute on foot or by  
bicycle.**

Take advantage of cold water when  
showering by filling a bucket with it and  
reusing it for the toilet

2

3

Plant more trees in the institute to have  
more shade and oxygen to breathe  
better.

That the institute has a water  
harvesting system and thus reuse the  
water obtained from rain

4

5

Give courses in schools and institutes to  
remember the use of the three "R" (Reuse,  
Recycle and Reduce)

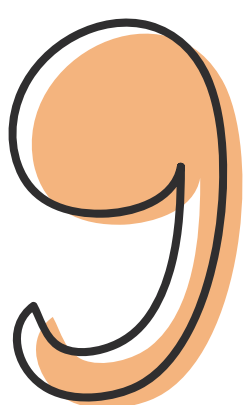

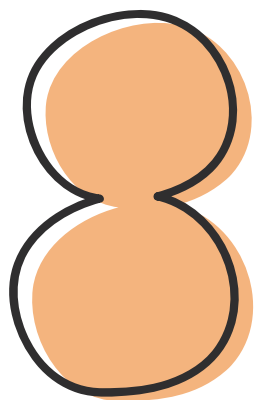

Using solar panels to save energy in homes and schools

Completely eliminate plastic bags and bottles to avoid contaminating.

Regularly carry out second-hand markets to reuse different types of products (clothes, utensils...)

Make garbage collections often in the natural environments of your town.

Use led bulbs that use less energy
